

Denys Strakhov

Profile

Backend-focused Fullstack Developer with 3+ years of commercial experience building API-driven web applications using Node.js and TypeScript. Strong background in backend development, third-party integrations, and serverless solutions on Azure, including Azure Functions, Durable Functions, Cosmos DB, Azure Storage, and Azure Key Vault. Experienced in designing REST APIs, implementing business logic, improving performance, and contributing to frontend solutions with React and Next.js when needed. Worked with Terraform and CI/CD pipelines, with a solid focus on code quality, testing, and maintainable production systems. Comfortable working in Agile teams and using AI tools to accelerate prototyping and development workflows.

Recently expanded backend knowledge with Python and FastAPI through structured hands-on coursework focused on REST APIs, validation, ORM usage, authentication, migrations, and testing.

Cologne, North Rhine-Westphalia, Germany

strakhov.denya@gmail.com

Core Skills

Node.js, TypeScript, REST APIs, Azure Functions, Durable Functions, Cosmos DB, Azure Storage, Azure Key Vault, Redis, PostgreSQL, Terraform, CI/CD, Jest, React, Next.js, Express, NestJS, Docker, MongoDB, Python, FastAPI

Experience

- **Feb 2026 – Present**
- **Volunteer IT Technician – HEY, ALTER! Köln e.V.**
- Refurbish and prepare donated laptops for school students
- Install operating systems and required software
- Test and configure devices before distribution

- **Nov 2021 – Apr 2025**
- **EPAM Systems**
- **Backend-focused Fullstack Developer**

- Built and maintained backend services and API-driven applications using Node.js and TypeScript in a serverless Azure

environment.

- Developed solutions with Azure Functions, Durable Functions, Cosmos DB, Azure Storage, and Azure Key Vault to support secure and scalable backend workflows.
- Designed and implemented REST APIs and business logic for data exchange between internal services and external platforms.
- Integrated third-party systems including CommerceTools, Amplience, and ProductsUp to support product and content-related business flows.
- Implemented Redis-based caching for selected API responses, reducing latency and improving overall application performance.
- Contributed to frontend development in React and Next.js, including accessibility improvements aligned with WCAG standards.
- Maintained code quality through automated testing with Jest, documentation, and peer code reviews.
- Supported infrastructure delivery and environment configuration using Terraform as part of CI/CD processes.
- Collaborated in Agile teams through sprint planning, daily standups, sprint reviews, and cross-functional delivery.

Tech Stack: TypeScript, Node.js, Azure Functions, Durable Functions, Cosmos DB, Azure Storage, Azure Key Vault, Redis, PostgreSQL, Terraform, React, Next.js, Jest

- **Jul 2021 – Sep 2021**
- **CHI Software**
- Node.js Developer (Intern)
 - Created backend services using Express and NestJS for educational and volunteer projects.
 - Built a Viber bot for hockey team management and an app for ticket sales (microservices).
 - Used MongoDB, Docker, and Kubernetes in team-based development.

Tech Stack: REST APIs, Express, NestJS, TypeORM, Angular, Docker, MongoDB, Kubernetes

- **Dec 2016 – Jun 2021**
- **Factor – IT**
- **PHP Developer**
- Developed backend tools and new functionality for budget accounting systems.
- Participated in database design, application architecture discussions, and legacy code refactoring.
- Worked on performance optimization and maintenance of

existing business-critical systems.

- Supported code quality through reviews and contributed to CLI-based development tooling.

Education

National Technical University "Kharkiv Polytechnic Institute"

Specialist degree – Process Engineer

Department of Integral Technology and Applied Chemistry

Certificates

Redis University — Redis for JavaScript Developers (2025)

Languages

Ukrainian – Native

Russian – Native

English – (B1/B1+): confident in technical reading, written communication, and participation in meetings

German – A2/B1 (Basic communication & understanding)

Additional Information

- Hands-on experience integrating external platforms such as Amplience, CommerceTools, and ProductsUp.
- Familiar with cloud-native architectures, infrastructure as code, and maintainable backend system design.
- Used AI tools such as ChatGPT and Cursor for MVP prototyping, iterative refactoring, and feature expansion in personal projects.
- Recently expanded backend expertise with Python and FastAPI, applying modern backend and AI engineering practices in personal projects, including REST APIs, SQLAlchemy ORM, Alembic migrations, API testing with Pytest, and LangGraph-based LLM workflows. Using GitHub Actions together with OpenAI-based review pipelines to automate code quality checks, regression detection, and test relevance validation within CI/CD processes.
