

Denys Strakhov

Backend-focused Fullstack Developer | JavaScript | TypeScript | React | Node.js | REST APIs

Phone: +49 160 96277376 | Email: strakhov.denya@gmail.com

LinkedIn: <https://linkedin.com/in/denys-strakhov> | GitHub: <https://github.com/strakhovdenya>

Cologne, Germany | Remote preferred | Open to hybrid/office roles in Cologne

Authorized to work in Germany

Potential EGZ hiring subsidy: up to 30% for 3 months, subject to Jobcenter approval.

Summary

Backend-focused Fullstack Developer based in Cologne, Germany, with commercial JavaScript/TypeScript experience across Node.js backend services, React/Next.js frontend features and BFF/API integration in a large-scale e-commerce environment. Worked across product data and content workflows, mapping backend data into frontend-facing models and integrating REST APIs while handling production issues across service boundaries. Experienced with Jest unit testing, pull request reviews and Application Insights/KQL debugging. Authorized to work in Germany.

Current Independent Work & Portfolio Projects

Freelance Software Development, Backend Portfolio Projects & Relocation

May 2025 - Present | Cologne, Germany | Remote

After relocating from Ukraine to Germany, continued working on small freelance tasks, backend-focused portfolio projects, continued learning and local volunteering.

- Supported small Node.js/React improvements on an independent basis, including feature additions, bug fixes, API-related changes, UI adjustments and maintenance tasks.
- Built JobFlow CV Pipeline, a backend-first NestJS/TypeScript portfolio project for AI-assisted vacancy analysis, human review gates and deterministic PDF export.
- Built Email Camp, a personal full-stack letter tracking and notification project using Next.js, TypeScript, Supabase/PostgreSQL and an email API.
- Volunteer IT Technician at HEY, ALTER! Köln e.V., refurbishing and preparing donated laptops for school students in Cologne.

Professional Experience

EPAM Systems

Backend-focused Fullstack Developer | Nov 2021 - May 2025

- Worked across production Node.js/TypeScript backend services, BFF/API layers and React/Next.js frontend areas on a large-scale multi-locale e-commerce platform.
- Delivered React/Next.js frontend features and API integrations as part of end-to-end fullstack changes, including component updates, product-page work and accessibility-related improvements.
- Updated existing GraphQL resolvers and mapped CommerceTools/CMS data into frontend-facing response models, handling optional and missing fields and debugging BFF issues.
- Integrated CommerceTools product catalog data into backend and BFF flows, handling retrieval by ID/SKU/key, search, filters, categories, optional values, pagination and custom batching.
- Automated selected Ampliance CMS workflows with Node.js/TypeScript Azure Functions, validation, logging, retries and cache updates where relevant, reducing selected manual operations from hours to minutes.
- Investigated production issues using Azure Application Insights and KQL, tracing failures across BFF layers, Azure Functions and downstream services.
- Wrote and maintained backend and changed-area frontend unit tests with Jest, worked within SonarQube quality gates and reviewed pull requests.
- Collaborated with frontend/backend developers, QA, BA, Product Owners, DevOps and other service teams through Agile delivery, release support and cross-service debugging.

Factor-IT

PHP Backend Developer | Dec 2016 - Jun 2021

- Developed backend functionality for a production public-sector budget accounting system, focusing on PostgreSQL-heavy features, complex financial/accounting logic and data integrity.
- Wrote complex SQL queries and worked with joins, subqueries, indexes, transactions and PostgreSQL migrations for financial/accounting data.
- Implemented PostgreSQL migrations for organization-specific databases, using transactions, test-database validation and rollback planning where possible.
- Optimized selected read-heavy PostgreSQL operations using indexes, query simplification and intermediate tables, improving performance by 2x+ in selected cases.

CHI Software

Node.js Developer Intern / Trainee | Jul 2021 - Oct 2021

Completed an intensive Node.js transition program focused on JavaScript backend development, REST APIs, Express/NestJS fundamentals, MongoDB, Docker basics and code review.

Education

National Technical University "Kharkiv Polytechnic Institute"

Specialist Degree - Process Engineer

Department of Integral Technology and Applied Chemistry

Top Skills

JavaScript / TypeScript | React | Next.js | Node.js | REST APIs | BFF / API Integration | Jest | PostgreSQL

Languages

Ukrainian - Native | Russian - Native | English - B1/B1+, professional working use | German - A2/B1, actively improving

Certifications

- Advanced Node.js: Scaling Applications - LinkedIn Learning Community, 2026
- Node.js: Testing and Code Quality - LinkedIn Learning Community, 2026
- Node.js: Security - LinkedIn Learning Community, 2026
- Node.js: Design Patterns - LinkedIn Learning Community, 2025
